REMARKS

The Examiner set the response period for three months from the mailing date of the Office Action.

The Examiner requested an election between Invention A, which was directed to a brake system having a spring clip for a wear sensor, and Invention B, which was directed to a wear sensor. The Applicant elects prosecution of Invention A which includes claims 1, 5-8 and 16-22.

The Examiner also referenced Species I shown in Figure 1 and Species II shown in Figure 8. All of the pending claims are generic to both species so no further action is believed to be necessary.
